

BAG ACCESSORIES/CLAMPS

Typical Bottom Load Style Unit

SIMPLIFY BAG INSTALLATION WITH BHA CLAMPS

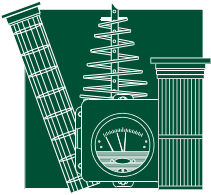

BHA clamps increase bag life by decreasing leakage and abrasion. Each clamp is designed specifically to ensure bag sealing and make filter installation simple and quick. BHA offers a variety of designs and sizes engineered to meet your particular needs. Our clamps can be used with raw edge, cord, hem, or sleeve constructed bags and some pleated filter elements.

There are several reasons why clamps can fail that should be considered when making purchasing decisions:

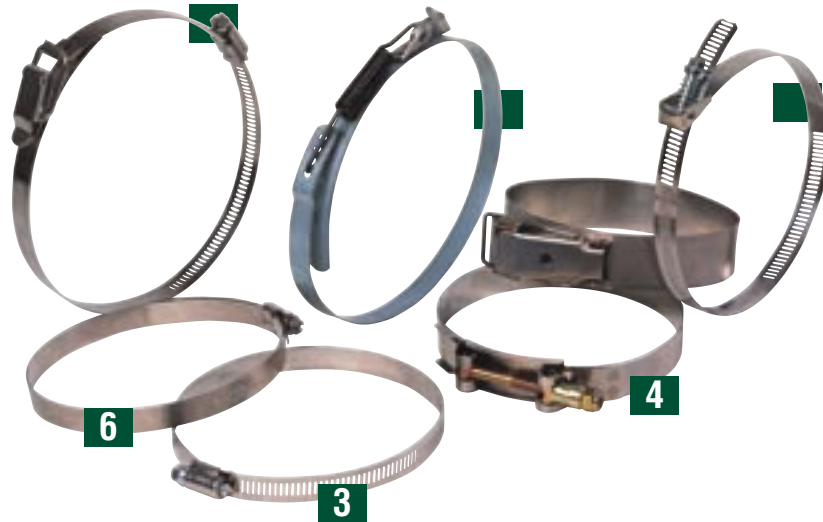

- ◆ Misapplication
- ◆ Misplacement
- ◆ Over torquing
- ◆ Re-use of old clamps
- ◆ Corrosion

BHA recommends replacing clamps each time filter elements are changed.

CLAMPS

Clamp	Description
1. WORM GEAR / LATCH COMBINATION CLAMP	<ul style="list-style-type: none"> ◆ Designed with a worm gear connection for tightening upon installation. ◆ Designed with a latch assembly for quick removal. ◆ Constructed of 300 series stainless steel and has a 9/16 inch (1.43 cm) band width.
2. QUICK RELEASE CLAMP	<ul style="list-style-type: none"> ◆ Swivel action locking of the screw to the band makes installation simple. ◆ Reduces downtime required during bag changeouts. ◆ Band and housing are constructed of 300 series stainless steel with no spot welds, reducing the possibility of rupture under stress. ◆ Clamp housing conforms to the round shape of the band, providing a stronger interlock.
3. WORM GEAR CLAMP	<ul style="list-style-type: none"> ◆ Specifically designed with lower housing to be used in areas where room is restricted. ◆ Easy to tighten, which ensures a leak-resistant closure.
4. T-BOLT BAND CLAMP	<ul style="list-style-type: none"> ◆ Used in high torque/clamp pressure applications where ordinary hose clamps fail. ◆ Available in general purpose and quick release styles depending on the application. ◆ More sealing pressure for bottom load collectors collecting fine particulate.
5. TOOL-LESS CLAMP	<ul style="list-style-type: none"> ◆ Designed for easy attachment to Norblo style bags. ◆ No tools required for installation or removal. ◆ Has a 6 inch (15.24 cm) diameter and 1/2 inch (1.27 cm) band width.
6. LINED CLAMP	<ul style="list-style-type: none"> ◆ Designed for BHA PulsePleat® filter elements. ◆ Constructed of 316 stainless steel. ◆ The liner protects the filters from extruding or shearing through the band notches on the clamp as it is tightened.
